For this reason, the value of the bank today will not be more than \$10.00 5 years from now. But \$10.00 invested in our bank's all plants should be worth \$60.00 to \$100.00 in a few years. In addition, you get a lot of pleasure watching them grow. You are also doing your part to help make a better world.

The plants we have to offer are too small now for landscaping, but by placing them in a nursery for a while, nurturing them - you will be surprised at the lovely flowering that will result in a few years. The specimens of Azaleas, Pieris Japonica, flowering trees, yews and alders many of our customers have acquired in a few years are amazing. These plants would be sold at the price of purchased as large specimens but with a little patience and care you can have the specimens from these baby plants we have to offer.

Plants should be started in pots or flats in October or November and moved on to 4" or 6" pots in January. Make good Christmas and birthday presents. All plants should be started in pots or flats one or more years before planting in permanent place.

For 100 plants for \$10.00 worth of plants from this lot. Prices include packing and no other charges. We will sell our plants at such low prices no order of less than 25 plants will be filled. No frozen lots will be sold. Where order calls for 5 for 50 cts. and 10 for 1.00 cts. 5 must be ordered. 25 sold at 100 rate.

unless you are able to discount.

Free on delivery, with delivery charge for 10 items ordered.

going to our garden peat with wet peat moss; the cost of Rapraes and
Gardner's 20 points over the Rapraes. Therefore, eliminates the profits. Therefore, please
add 20 points to the Rapraes 20 points.

These plants grow under the eucalypts and are very easy to handle if placed in a dark shade, covered either by a netting or a bath screen; this should be elevated 4' to 5' on stakes to provide free circulation of air underneath. Plant in a soil mixture made of fine 2 1/2" good loam, garden loam and thoroughly rotted peat moss or oak leaf mould. Water occasionally planting the mulch with leaf mould or peat moss. Do not cultivate but pick weeds as they spring. Do not allow ground to get dry, but do not water too much or too often, there is a huge medium. These plants will grow in part shade and also in sun. Cut off 1/3 of light for first 3 weeks and then lift.

LEAVES AND OTHER ACID LOVING PLANTS:

"Some of the flowers said speaking of Azaleas, "they are not surpassed in south of France by any class of many shrubs. The flowers vary enormously in size in the different species and embrace all shades of every color except blue. In many, the flowers are remarkably fragrant. We could wonder the desire to possess them is a general. So class of shrubs possesses greater attractions, and given certain special conditions and culture, no varieties are perfectly hardy their culture is fairly simple."

A Philadelphia collection of Angeli and Rhododendrons is visited each year by thousands of people attracted by the brilliant, vivid colors and profusion of bloom, which usually begins in May. And for a few dollars and a bit of patience a more extensive collection can be had, as available from this list.

growing in and on the grass and flowers in profusion. Small, very, green leaves, like the ones of the "Moss" plant - 1/2" - 1" long by 1/4" wide.

In winter time American gardens present a dismal, naked sight that emphasizes the general dreariness of the season. Little of the beauty of spring, summer or fall remains. Yet it is so easy to change this with a few evergreen vines, shrubs and trees and some bright berried shrubs. With an attractive evergreen background, winter seems shorter and much more pleasant and nothing is a more beautiful sight than to see them partly covered with snow.

EVERGREEN TREES AND SHRUBS. Plant in any good soil. All should be well shaded for 2 months after planting with a lath shade or planted in part shade of a building. Mulch with either peat moss or leaf mould. Most of the following plants will make handsome specimens in three to four years.

- Pachysandra Terminalis. 5 for 50 cents - \$5.00 per 100. Plant 6" apart.

The pines or spruces are most attractive evergreen trees which introduce a horizontal note into landscaping and give a wonderful variety of color and shapes. Both Firs and Spruces make majestic trees, are very symmetrical and keep a good color in winter.

- PICEA EXCELSA - Norway Spruce, grows rapidly into a beautiful symmetrical tree.

4-7" - 3 for 50c.

- PICEA PUMIL - Colorado Blue Spruce - stiff blue needles, 3-6" - 3 for 50c.

Most Pines grow rapidly, some more rapidly than deciduous trees, making as much as 30 inches a year. Make good screens, backgrounds and the best possible windbreaks. With a good Pine border on the windward side, your home will seem 500 miles further south and you will be able to grow plants that are otherwise impossible. A windbreak of pines will make your home more comfortable and life more pleasant, by protecting it from the cold winds.
